## PRAISE FOR *THE ART OF PRODUCT DESIGN*

"Hardi tells two fascinating stories with this book, one about how he founded and grew GrabCAD and the other about how he sees the world of product design changing. Both stories are relevant to anyone seeking to take advantage of new online communities and connections to grow their business."

—**Dean Kamen**, Founder of DEKA Research and Development Corp.

"The communications revolution created by the Internet is breaking down barriers between countries, as well as companies, enabling talented individuals everywhere to find opportunities around the globe. *The Art of Product Design* is a story of how smart, creative people from around the world can find each other, solve problems, old and new, and do amazing things."

—**Toomas Hendrik Iives**, President of Estonia

"We are fortunate to be living through the most important communications revolution in human history. The ramifications of real-time communications instantly connecting every human on earth with every other human on earth is even more important than the invention of moveable type and the printing press more than 500 years ago. Yet most executives think these changes only relate to their company's PR and marketing departments. Hardi Meybaum shows us how the digital revolution impacts product design and manufacturing and explains why fortunes will be won and lost in the new world order. You need to know how your organization will thrive in an environment where CAD is in the cloud and engineers in every corner of the world suddenly have access to the sophisticated tools and massive processing power that only the richest companies could once afford."

—**David Meerman Scott**, marketing strategist and international bestselling author of *The New Rules of Marketing and PR*
